

## POSTER SESSION

### IPEC Europe 20<sup>th</sup> Anniversary Seminar “Looking back, Moving forward” 26 January 2012 – Barcelona (SP)

Following the success of the 2011 first edition, IPEC Europe has decided to organise again a forum session at its 20 year anniversary in Barcelona.

This is an outstanding opportunity to present innovative scientific projects in front of some of the leading figures in excipients.

This year, IPEC will favour posters addressing “**excipient delivery and technology systems**”, including challenges in excipient design and regulatory processes.

Space at this unique event is limited, so those interested in participating are advised to contact the IPEC Europe secretariat as soon as possible, and no later than **30 November 2011**.

Posters will be subject to approval by the IPEC Europe Event Committee, and those selected will have the opportunity to present their work to the seminar delegates. Please note that posters with a purely commercial nature will not be accepted. Booth space will be available upon request, as part of the event sponsorship.
